ABOUT US

- ❖ Nitro Explosives (T) Ltd, is a registered entity since 1997. From 2002 dealing with commercial explosives, detonator assemblies, blasting services, explosives storage and explosives stores/magazines construction on behalf of the Clients. Nitro Explosives(T)LTD confirm to Local Content guidelines while Austin Powder from USA is in partnership.
- ❖ Head Office is in Arusha – Tanzania. Distribution points, magazines situated at Mirerani-Simanjiro serving Mirerani Tanzanite Mines, Nanyala-Mbozi serving the Southern zone, Makombe-Lugoba serving the Eastern & Central zone, and Kitengwe-Nzega on the making targeting to serve the lake Zone. At Mavuji (Lindi Region) Emulsion Plant is set up called EDEN, ready to manufacture mid-June 2021, this will supply the whole of Tanzania and neighboring countries using Bulk Tankers and MMU's. With this set up, Nitro can easily supply PUMPABLE EMULSION to our clients in various places within Tanzania and Neighboring Countries.
- ❖ Our clientele to be, Small and Big Scaled Miners, Quarries, Road Constructors, Cement Factories and other Infrastructure Projects. This include participating on mega national projects such as the Standard Gauge Rail Construction, Hydropower Dam, Rapid Bus Transport System, other dams and bridges in Tanzania.
- ❖ Export Commercial Explosives to Kenya, Rwanda and Ethiopia with our own Logistics.
- ❖ Supply Seismic Exploration Projects in East Africa.
- ❖ On all these projects, we supply commercial explosives together with blasting services through our long-experienced teams of highly trained and certified Blasting Crews.

Company Mission

- ❖ Safety is our first priority.
- ❖ Our company Mission is to provide safe and high standard services and quality products to customers who require Commercial explosives products or services in the mining and construction industries in Central and East Africa.
- ❖ Building a strong management team and support staff to serve customers as per their expectations.
- ❖ Learning from industry leaders and adjusting to demands.
- ❖ Building strong relationships and partnerships with suppliers and sub-contractors.
- ❖ Acquiring and building strong business relationships with Companies in countries targeted for expansion.
- ❖ Building sustainable relationships with Tanzanian small scale mining customers.
- ❖ Increasing Capability, Storage and Manufacturing Capacity.
- ❖ Extend functions on our own blasting software – Nitro Blast Insight.
- ❖ We deliver safely and on time.

Company Vision

- ❖ We strive to become the best supplier of commercial and seismic explosives in East and Central Africa.
- ❖ Unique and creative solutions that meet the client's expectations regarding the ethical principles of relationships and not transactions.
- ❖ Creative approaches to the client's special needs to find unique and tailored solutions.
- ❖ Teamwork is based on progressive communication.
- ❖ Professional quality of services provided by a highly motivated team.
- ❖ Strong technology background from Austin, backed by superior quality products.
- ❖ 24/7 availability.
- ❖ To always do honest business to keep up with our good credibility.
- ❖ ALWAYS ON TIME

OUR SERVICES

- ❖ We supply selected commercial packed explosives.
- ❖ A range of Shock Tube Detonators is within our reach, namely for underground and the open cast Nonelectric Detonators.
- ❖ Ammonium Nitrate Porous Prill in 25kg bags and Jumbo bags. ANFO (Ammonium Nitrate Fuel Oil) on order can be supplied to our clients ready for use in 25kg.
- ❖ Detonating Cords from 3.5 gram/meter to 40 gram/meter.
- ❖ PETN Boosters in different sizes as per customer requirements.
- ❖ We also provide professional blasting services as per client's requirements including training, technical advice, explosives storage and logistics or delivery up to legal end user.
- ❖ We also supply or pump, straight or blend emulsion as per the client's requirements, down the hole.
- ❖ Non-Explosives where Commercial Explosives cannot be used.
- ❖ Vibration and air blast monitoring as well as blast analysis.
- ❖ Handheld Rock drills, drill steel and bits.
- ❖ Supply blasting accessories such as seismographs, shot exploders and resistance meters.
- ❖ Strictly, all our services are provided to the licensed Clients.

CORE VALUES

- ❖ Professionalism.
- ❖ Honesty and Loyalty.
- ❖ Safety.
- ❖ Customer Centric.
- ❖ Integrity.
- ❖ Pioneering Technology.
- ❖ Staff Education and Empowerment.
- ❖ Quality Service and Quality Products.
- ❖ Community Development and upliftment.

FUTURE STRATEGIES

- ❖ Due to the growth in infrastructure projects and mining activities, Nitro is focusing to extend its services beyond limits.
- ❖ Tanzania to the Neighboring Countries. Our research has exceeded our expectations and we are in the process of gearing up for large growth in various neighboring East and Central African Countries.
- ❖ With the entry of Austin Powder an Emulsion Plant has been established to include manufacturing on the list of activities, with an intention to cover Tanzania and the neighboring Countries.
- ❖ Professional Services in the form of blasting services, staff training, and technical advice has been a small arterial to our main business of explosives sales, but there is a large need for these services, and we attend to meet this demand by growing our staff required to provide these services.

SEISMIC BOOSTER

GEOPRIME®

Bioremediation Technology in Pentolite

Product Description

GEOPRIME is a high energy, highly reliable, seismic explosive containing patented bioremediation technology (see back for detailed explanation) and made from the highest quality PETN and other high explosive materials ensuring reliability, consistency and durability. GEOPRIME provides consistent energy release in all extreme seismic environments regardless of hydrostatic pressure or borehole depths.

Application Recommendations

- **NEVER** use Dyno Nobel seismic explosive products and/or components with explosive products and/or components made by other manufacturers.
- **ALWAYS** use the Dyno Nobel Electric Super Seismic high strength detonator for optimum results.
- Recommended temperature range is -40°C to 65°C (-40°F to 150°F). Geoprime is unaffected by extremely low temperatures but detonators produce less energy below -40°C (-40°F).
- **ALWAYS** use built-in cap wells for seismic detonators. Two detonators are recommended for insurance and reliability where extreme environmental conditions or prolonged exposure periods are encountered.
- Maximum water depth is 92 meters (300 feet; 125 psi) for 6 months.
- **ALWAYS** use 10 gm/m (50 grains/foot) or higher core load detonating cord with a double wrap clove hitch knot when initiating Geoprime with detonating cord not configured for Cut To Fit initiation. Light core load "Cut to Fit" (2.2 gm/m, 10 grains/foot) detonating cord is only recommended with Cut To Fit Geoprime.

USE CAUTION WHEN SLEEP TIME IS ANTICIPATED

A loaded hole that is not shot immediately after the detonator tests positive with a ShotPoint Tracker™ or other testing device could fail for reasons beyond the control of the drill crew and product manufacturer. Reasons for failure could include but are not limited to geologic shifting, lightning, vandalism, farmer or animal interference.

Technical Information

Properties

MSDS
#1145

Energy ^a (cal/g)	1,500
Gas Volume ^a (moles/kg)	27.9
Velocity ^a (m/sec)	7,500
(ft/sec)	24,600
Detonation Pressure ^a (Kbars)	230
Density (g/cc)	1.63
Water Resistance	Excellent

^a All Dyno Nobel Inc. energy and gas volume values are calculated using PRODET™, the computer code developed by Dyno Nobel Inc. for its exclusive use. Other computer codes may give different values.

^a Unconfined 57 mm diameter x 2 kg charge.

IMPORTANT!

Ignoring these warnings may result in injury or death!

- **ALWAYS** exercise extreme caution when approaching a shothole that has not vented. Venting gases after detonation are common. BLOWOUTS CAN INJURE OR KILL.
- **NEVER** attempt to alter the product by cutting, sawing or disassembly of the package.
- **NEVER** drop load explosive into a borehole.
- **NEVER** attempt to dislodge explosives by pushing with a drill stem.
- **NEVER** unshunt electric detonators prior to use except to test with blasting galvanometer.
- **ALWAYS** shunt electric detonators and/or the blast circuit after testing and keep shunted until connected to blasting machine.
- **NEVER** use light core load "Cut to Fit" (10.6 grains/foot, 2.2 grams/meter) detonating cord to prime GEOPRIME.
- **ALWAYS** ask if you don't know before proceeding.

BLASTING

BLASTING MATERIAL AND BLASTING SERVICES

COMMERCIAL EXPLOSIVES IN OUR MAGAZINES.

- ❖ Packed Explosives: Cartridges and Pentolite boosters. (including Seismic)
- ❖ All Detonator Assemblies: include I.E.D, all Dual Det downlines, Surface Delays (Shock Tubes) cord delays (dog bones), blasting wire, safety fuse, igniter cords.
- ❖ Detonating Cord
- ❖ Porous Prill Ammonium Nitrate.
- ❖ ANFO 25kg bags.
- ❖ Bulk Emulsion (Hydromite) : Pumpable Emulsion and Emulsion Blend.

BLASTING SERVICES

- ❖ Surface Blasting.
 - a) Surface Blasting in quarry mines.
 - b) Surface blasting in gold mines.
 - c) Surface blasting in diamond mines.
 - d) Surface blasting in coal mines.
 - e) Surface blasting in infrastructure projects.
 - f) Non- Explosives blasting for sensitives areas.
- ❖ Underground blasting.
- ❖ Tunnel blasting.

SAFETY, HEALTH AND ENVIRONMENT

"Safety is our First Priority"

- ❖ Nitro takes the health and safety of our people, stakeholders and the environment very seriously. Our top priority is our commitment to the safety and health of our people, customers, and society in general by keeping our operations and products safe and secure.
- ❖ We pride ourselves on a Company Culture that centers and cultivates character development, education, accident prevention and compliance with our SHE Management System.
- ❖ We see every person in every aspect of our business as a valued member of our family where everyone looks out for their brothers and sisters.
- ❖ In line with our vision to become the best supplier of commercial and seismic explosives in East and Central Africa, we are committed to complying with and surpassing national and international standards in health and safety. .
- ❖ We support and encourage practices that enable all personnel to perform SHE heroic actions while fulfilling national, international and customer requirements.

SAFETY, HEALTH AND ENVIRONMENT

“Safety is central to all activities across our business.”

- ❖ Safety for our customers, team members, and communities is a mission-critical focus for our team. We approach safety with a proactive mindset and the belief that through adequate planning and proper execution: all operating exposures can be safeguarded, and all accidents can be prevented.
- ❖ Our Safety, Health and Environment Policy affirm our aspiration to avoid harm, empower our people to perform their tasks safely and responsibly, and continuously improve our performance. We are focused on identifying potential hazards and risks before they take place and then taking steps to eliminate them.
- ❖ To guide our people in workplace health and safety, we have a strict and comprehensive set of standards and procedures which form our Safety, Health, and Environmental Management System, built on a strong foundation of leadership and competency. These documents/protocols specify the requirements and controls that must be in place to protect our people, customers, and communities.

“Our safety culture is aligned with our core values of care and service”

- ❖ Thanks to our rigorous training programs, focus on preventative maintenance, and stop-work protocols, we have been able to install a safety-centric culture across the entire Nitro family, our fleet, workshops, magazines, plants and blasting sites.
- ❖ We strive to ensure that all our customers are aligned with similar missions and regard for safety.

HEALTH & WELL-BEING

- ❖ In line with our actions to ensure safety, we pride ourselves in caring for and ensuring the health and well-being of our people by minimizing the potential for adverse health impacts associated with our operations.
 - ❖ We ensure all our fleet, facilities, and workplaces meet all basic and statutory requirements for maintaining health and welfare for growth.
 - ❖ Each of our employees and their families is insured with a healthcare plan with access to hospitals all over the country.
 - ❖ We support and encourage positive and healthy lifestyles to our personnel through corporate actions in workflows and schedules.
 - ❖ We continually promote health and well-being in our operations through awareness raising on all workplace health-related aspects.
 - ❖ We encourage all our employees on the involvement in sports and games to enhance physical and mental well-being.
 - ❖ We maintain a diverse, non-discriminatory, and safe work environment for everyone to ensure healthy workplace interactions and positive mental health.
 - ❖ We continually strive to ensure a family-centric workplace with a focus and support on cultivating positive interactions for mental well-being.

HEALTH & WELL-BEING

- ❖ We are committed to safety and well-being of our employees and customers, by ensuring they have access to prompt medical care in case of emergency.
